

THE VALUE OF HOSPITAL MERGERS

HOW PATIENTS BENEFIT

Hospitals and health systems are transforming to create coordinated systems of care for patients.

They are redesigning how they deliver care to meet patients' needs and provide patients and communities more convenient, cost-effective and innovative services. Realignment becomes necessary to remain competitive in a rapidly changing environment. The benefits of scale and scope were seen during the pandemic as integrated health systems evolved quickly to move staff and secure supplies and other resources necessary to meet the health needs of patients and communities.

ADVANCING QUALITY

Mergers promote the spread of best practices across systems and the standardization of clinical protocols.

MAINTAINING ACCESS & ENHANCING SERVICES

Patients have access to more doctors, state-of-the-art equipment and specialty services.

Coordination allows for a spectrum of comprehensive services to meet all of a patient's health needs.

FUELING INNOVATION

Expanding telehealth services to deliver needed care where patients are.

Advancing health through new models of care and leveraging technology and data in novel ways.

TRANSFORMING TO MEET MARKET FORCES

As large companies with no health care experience are entering the field, mergers allow hospitals and health systems to remain competitive and provide all patients access to knowledgeable and experienced health care professionals.
